SKILLS

Programming: Python, Java, C++, C, SQL, Problem Solving, Internet of Things.

Tools: PyCharm, Jupyter Notebooks, Git, Arduino IDE, OpenAI, Supabase, Netlify.

Frameworks/Packages: TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, PyTorch, OpenCV.

AI/ML Domains: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing (NLP), Generative AI.

Web & Backend: Flask, Node.js, React, RESTful APIs.

Cloud & Blockchain: Cloud Computing (Azure), SAP (ABAP Cloud).

EDUCATION

JIS College of Engineering

Kalyani, India

Bachelors of Technology in Computer Science Engineering with specialization in AI & ML

Expected Graduation- June 2027

- **Concentrations:** Artificial Intelligence, Machine Learning, Data Science
- **CGPA:** 8.07
- **Related Coursework:** Data Structures & Algorithms, Compiler Design, Operating Systems, Machine Learning, Computer Networks, DBMS, Linear Algebra, Probability & Statistics, Mathematics

12th (ISC): Authpur National Model School (2023) - Marks: 69.25%

10th (ICSE): Authpur National Model School (2021) - Marks: 79.80%

EXPERIENCE

Confitech Solutions Pvt. Ltd.

Remote

AI/ML Engineer - Intern

17th May, 2025- 18th Aug, 2025

- Developed and maintained scalable AI/ML applications using Python and Flask, improving system processing speed by 20%.
- Implemented Generative AI (GenAI) solutions leveraging OpenAI and Azure, automating key workflows and reducing manual processing time by 10 hours per week.
- Integrated RESTful APIs and collaborated with backend developers to streamline data pipelines, ensuring 99% uptime for seamless data flow.

PROJECTS AND PATENTS

Arachnid Bio-Inspired Spider (Patent)

Patent No. 202531071175 A

AI Developer & Circuit Connection

Aug 2025

- Implemented computer vision algorithms via OpenCV and deep learning to track endangered animals, achieving a detection accuracy of 82%.
- Processed and cleaned over 15 GB of raw habitat data to identify movement patterns, retraining models to boost predictive accuracy by 11%.
- Configured seamless IoT hardware integrations (Arduino Mega, Raspberry Pi 4, Pi Cam) for real-time video capture and transmission with under 250ms latency.

IntelliEat Monitoring System (Project)

Team Lead

Aug 2024 – Present

- Engineered an IoT-enabled smart plate and utensil system to track and analyze eating behaviors in real-time.
- Integrated advanced sensors to continuously monitor critical dietary metrics, including food intake volume, chewing speed, and overall meal duration.
- Developed ML algorithms to analyze sensor data, detecting patterns associated with eating disorders (e.g., anorexia, bulimia) with 85% precision.

ACTIVITIES AND LEADERSHIP

AICTE Idea Lab Ambassador

Kalyani, India

Represented AICTE Idea Lab — promoted student innovation through workshops and events.

May 2024 – Present

IoT and 3D Modelling Lead

The Risers

Kalyani, India

Co-founder and member

Dec 2023 – Present

InnovCon 2025

Kalyani, India

Event Organiser

Feb 2025

- Organized and led a 12-hour 3D Modelling Hackathon, fostering student engagement in 3D design and enabling participants to explore real-world applications of 3D modelling and usage.
